

SOSA

Sosa is a modular system of soft sofas standing out with its exquisitely refined proportions. Despite their physically tangible weight, sizeable dimensions and strongly contoured shapes, sofas from the collection come across as an incredibly light and sleek, almost levitating above the floor. The effect has been achieved by using a technologically advanced load-bearing frame structure which combines slenderness and subtle cross-sections with an incredible span and stability.

Sosa furniture is elevated high on long slender legs. Despite not being very thick, the seat and backrest elements are exceptionally soft and comfortable. The meticulously finished joint between the legs and the upholstered frame gives the sofa an upscale look. Sosa is a furniture system with many different faces. Users are free to choose their preferred style and character by selecting the type of leg finishing and fabric.

The family consists of 1-, 2-, 2.5- and 3-seater sofa modules in a variety of configurations: without armrests, asymmetrically designed with a single armrest or traditional, featuring two armrests — as well as pouffes. The multitude of elements offers virtually unlimited interior arrangement possibilities. The collection is complemented by rectangular coffee tables with a universal design, equipped with wooden tops, available in four different sizes.
